Advanced ITS

Integrated Telephone System

- 16-digit LCD with clock
- Hands-free speakerphone
- 30-station one-touch/speed dialer
- Auto Redial
- Call Restriction

Data Port

INTEGRATED TELEPHONE

KX-T2375

A new ITS series designed to answer today's advanced business needs.

The KX-T2375 starts with a host of convenient features – including Speakerphone, Auto Redial, Data Port, and Dial Lock – and adds extras such as an LCD clock that shows the current time and call duration. And it introduces sophisticated styling that helps give your office an impressive look to match its performance.

Outstanding Features with Built-in Quality

16-Digit LCD Display

The convenient 16-digit LCD shows you the number dialed, call duration, and time of day, and indicates when batteries are low. You can make settings for a host of features – Timed Flash, Dialer, Call Restriction, Dial Lock, LCD Contrast, Music Hold, Volume Level, and others – while viewing the LCD, giving you a level of operating ease that any busy office appreciates.

Hands-Free Speakerphone

The built-in speakerphone enables hands-free operation. You can answer calls without the handset or let others in the room join in the conversation.

Data Port

A second jack on the back of the phone allows you to connect a computer, modem, fax machine, answering machine or other single line device.

30-Station One-Touch/Speed Dialing Numbers

Twenty one-touch dialing buttons are ideal for storing emergency or frequently-dialed numbers. You can also store and retrieve 10 phone numbers for 2-step speed dialing. Having a total of 30 stations is a great time-saver when searching for, and dialing numbers.

Dial Lock

Using a numerical code you can lock (and unlock) the dialing keypad, so outgoing calls cannot be dialed, but incoming calls can be answered.

Call Restriction

Allows you to prohibit the dialing of unauthorized numbers.

Headset Jack

Enables you to connect an optional headset to the unit for hands-free conversations.

Auto Pause

You can set one-touch and speed dial numbers in advance with automatically varying pause lengths. This prevents misdials by letting the unit detect the dial tone. You can also insert pauses while redialing.

Electronic Volume Control

The convenient volume control buttons allow you to change the receiving volume of the speakerphone (in 8 steps) and handset (in 4 steps) during a conversation.

Auto Redial

Redials the last number called. If the line is busy, the unit automatically disconnects the call and then redials the number repeatedly at regular intervals. This is especially convenient when you have an important call to make to a busy number.

User Programmable Timed Flash (80/90/100/110/200/250/300/400/600/700 ms)

For use with automatic dialing and special phone company services such as call waiting.

Additional Features

Electronic Hold on Music
Ringer Indicator
Programmable Tone/Pulse Settings
Insertable Pause (time delay)
3-step Ringer Selector: off/low/high
Telephone Line-Powered Operation
One-touch Tone Switching
One-touch Wall Mountable
Mute
